

BORNE BÉTON PETITE

Le Corbusier

It was 1952 when Le Corbusier designed Borne Béton for the outdoor area of the Unité d'Habitation in Marseille and to enlighten Bhakra Dam, Sukhna Dam in India. An early experiment in the use of concrete for a collection of lamps along the lines of Brutalist architecture. Raw, spartan concrete is combined with a built-in LED source, combining different volumes emphasised by light. The small aesthetic and finishing variations make each Borne Béton a unique project.

LED INDOOR

LAMPING

Source	LED board
Total power	19W
Emission	direct
Switching	dimmable on cable
Tension	120V
Color temperature	3000K
Luminous flux	960lm
Typ CRI	80
IP class	20
Dimensions	11.8"x8.7"x12.2"
Materials	concrete+pmma
Notes	cable length 8.8', *please note: this fixture is made of natural poured concrete which may appear as imperfections
Net lamp weight	29,8 lbs

Codes

BBP LDW 21

Structure

concrete+PMMA

PACKAGE

Package 01

Dimension: 17.3" x 13.8" x 17.7" inches / Gross weight: 33,1 lbs
